

IMPORTANT INFORMATION

Please Note: Smelling diffuser oils straight from the bottle is not a good representation of what they smell like when they are being diffused or sprayed. For the best experience, allow the product to move throughout the area using your method of choice.

Safe for people and pets

How To Use - Works With All Diffuser Types

Ultrasonic Diffuser (Mix oil with water)

Use approx. $\frac{1}{4}$ - $\frac{1}{2}$ fill in your dropper per 75 – 100 mL (2.5 - 3.5 oz.) of water. Some essential oil fragrances are more robust than others, therefore, some fragrances may require a little more or less than others.

Nebulizer/Waterless Diffuser (Use straight oil)

Add undiluted oil into the device's reservoir.

Reed Diffuser

Fill your favorite container with oil and let the sticks absorb the scent. Flip sticks over to rejuvenate them.

HVAC Scent Systems

Follow individual unit's directions.

Oil Warmer

Put a small amount of oil in the reservoir and turn on lamp for a constant aroma. Although our diffuser oils are non-flammable, we recommend not using an open flame as the heat source.

Fine Mist Spray Bottle

Simply twist on the sprayer and use to scent any area.

Ruh Gulab – *Rose Ombré*
Doda Lavender – *Lavender*
Neroli Blossom – *Orange Blossom & Neroli*

Because this product is 100% active, oil-based, blended with fine fragrance and made with natural essential oils:

- **Avoid contact with** leather, vinyl, wood, plastic, and painted surfaces. If any product gets on these surfaces, immediately wipe it off with a wet cloth.
- **Very slippery on bare floors** – When spraying this product over bare non-carpeted floors, the oil can make the floor slippery. This usually happens when multiple sprays are sprayed in the same area. If this happens, clean up the overspray using a wet mop or cloth. Can also be sprayed in room corners and furnace filters.

Long Lasting
Effect

Cruelty-Free

Non-Flammable

Safe For People
and Pets
