

XLC MAL-ODOR COUNTERACTANT

IMPORTANT INFORMATION

This is a professional product. Please read this information for proper usage.

The first time you try this product, spray 1 spray in a room / area and move away from it. Rather than trying to go smell it right away, let it move throughout the area so you can see how powerful it is and how you only need a small amount of product.

Because this product is 100% active, oil-based, blended with fine fragrance and made with essential oils, it is:

- **Very slippery on bare floors** - To learn how to use this over non-carpeted floors, read **Q&A #5** on the reverse side.
- **Very powerful** - Follow the spray chart, you only need a small amount of product for maximum results.
- **Because this product does not contain water and is 100% active, avoid contact with** leather, vinyl, wood, plastic and painted surfaces. It could leave a mark on the surfaces listed. If overspray does get on these surfaces, immediately wipe it off with a wet cloth.

Understanding the value of the Blaze Away™ XLC Mal-odor Counteractant

There are **3 basic ways to remove odors**. Using an ozone machine, odor bombs / foggers or using a professional service. Each one of these options on average has a cost between \$10 – \$100 or more and are time consuming.

On average, the Blaze Away™ XLC Mal-odor Counteractant works with 1 – 3 sprays of product and there are about 350 sprays in this 16 oz. bottle. You will be able to remove odors out of at least 100 rooms / areas with huge savings.

BLAZE AWAY™ XLC MAL-ODOR COUNTERACTANT

QUESTIONS & ANSWERS

1 **Q: How does your technology work?**

A: Blaze Away™ is blended with essential oils, fine fragrance and XLC Mal-odor Counteractant technology that goes after the molecules that make odors smell bad and renders them undetectable. Once the odor is gone, it is permanently gone until a new odor is introduced.

2 **Q: What odors does Blaze Away™ work on?**

A: Smoke smells of all kinds, cannabis, cigarettes and cigars, cooking odors, pet odors, urine, body odor, plumbing issues, mustiness / mildew, fire restoration and can be used for upscale, general scenting.

3 **Q: How do I use Blaze Away™**

A: To remove odors, simply spray the product in an arc-like motion from one side to the other, while spraying the product in the air. A very small amount goes a long way and following the spray chart is very important.

4 **Q: Why does this product seem so expensive?**

A: Because you only need 1 – 3 sprays of product to remove your worst odors, you will get at least 100 rooms out of 1 - 16 oz. bottle and it will cost you about \$0.75, compared to the high cost of using an ozone machine, odor bombs, or foggers. With 2,100 sprays per 6 pack, you will likely only need to reorder this 1 – 2 times per year. You will save hundreds if not thousands of dollars while increasing quality scores.

5 **Q: Our rooms are not carpeted, how do I use this oil-based product over bare floors such as tile, vinyl, ceramic and wood (CAUTION)?**

A: Because Blaze Away™ does not contain water and is oil-based, it will be slippery when sprayed over bare floors. To keep this from happening, your property can designate a bed sheet or a large towel to be put down on the floor first, in order to help protect it from the product's spray. Additionally, you can clean up the over spray using a wet mop or cloth. The product can also be sprayed in toilets, trash cans, and in the corner of rooms.

6 **Q: Are there any areas that I should not spray Blaze Away™?**

A: Since Blaze Away is 100% active, very powerful, and oil-based, it should not be sprayed on leather, plastic, or painted surfaces.

7 **Q: What scents of XLC Mal-odor Counteractant does Blaze Away™ come in?**

A: Fresh Air and Linen Breeze.
